

Supplementary File 5

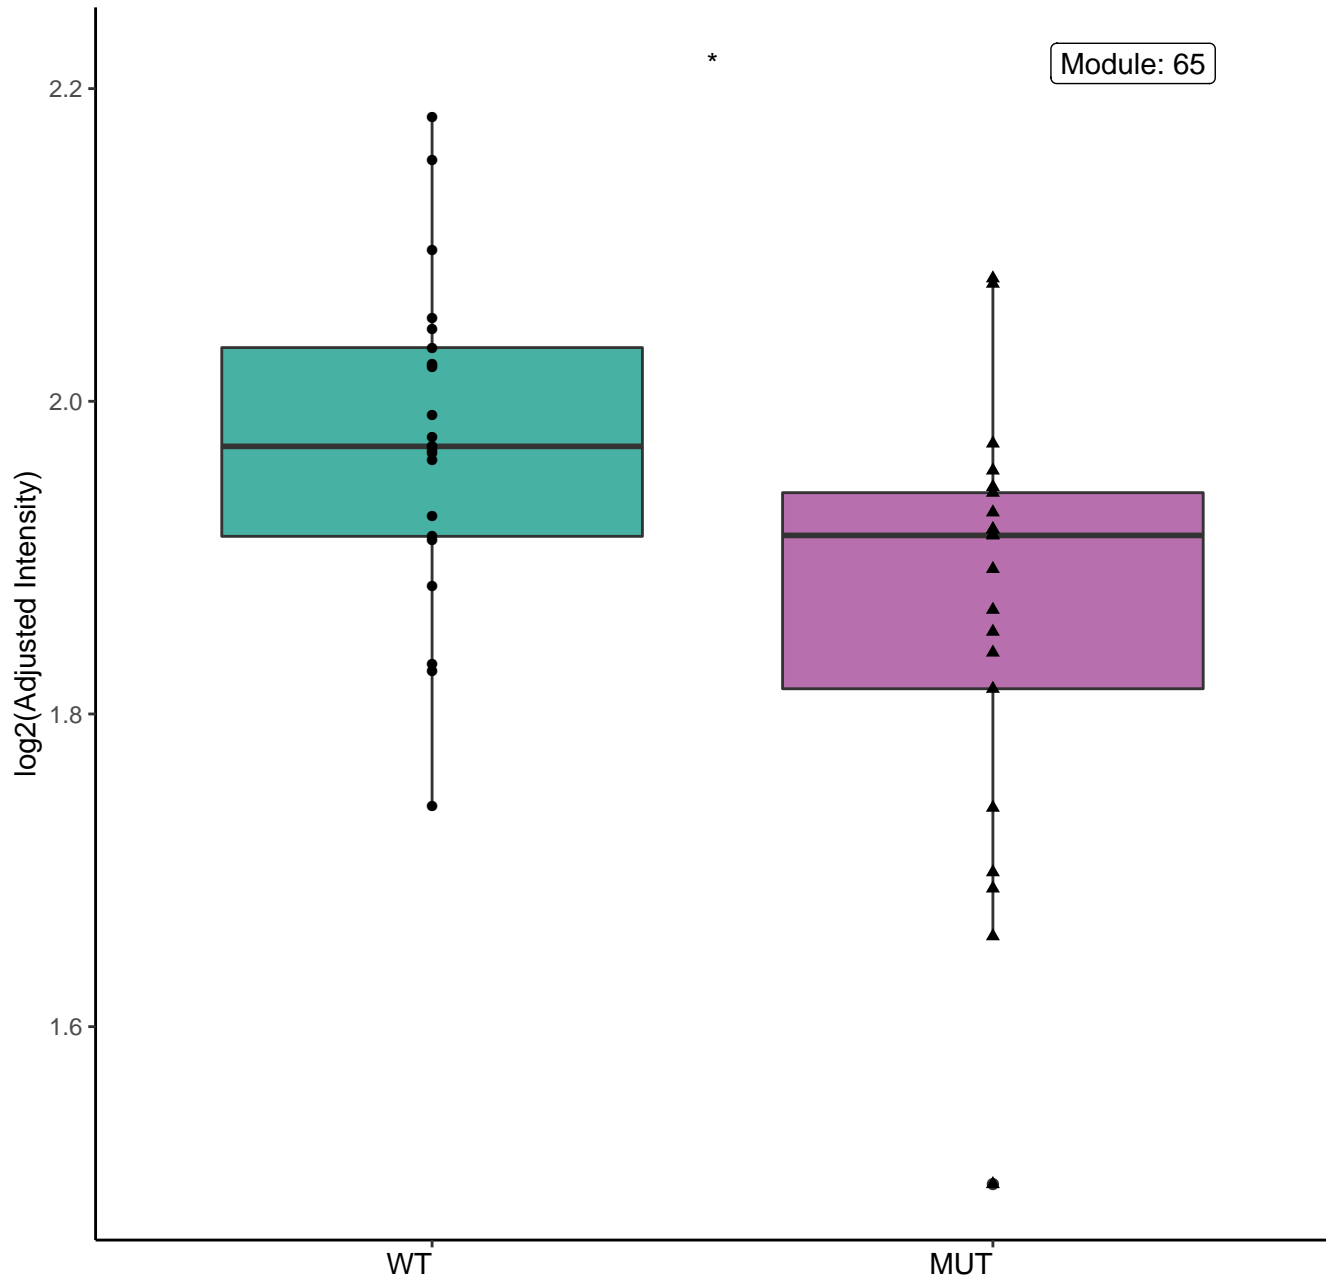

Plots of protein abundance adjusted for fraction differences.
686 proteins display an overall difference in abundance between WT and MUT groups (FDR < 0.05)

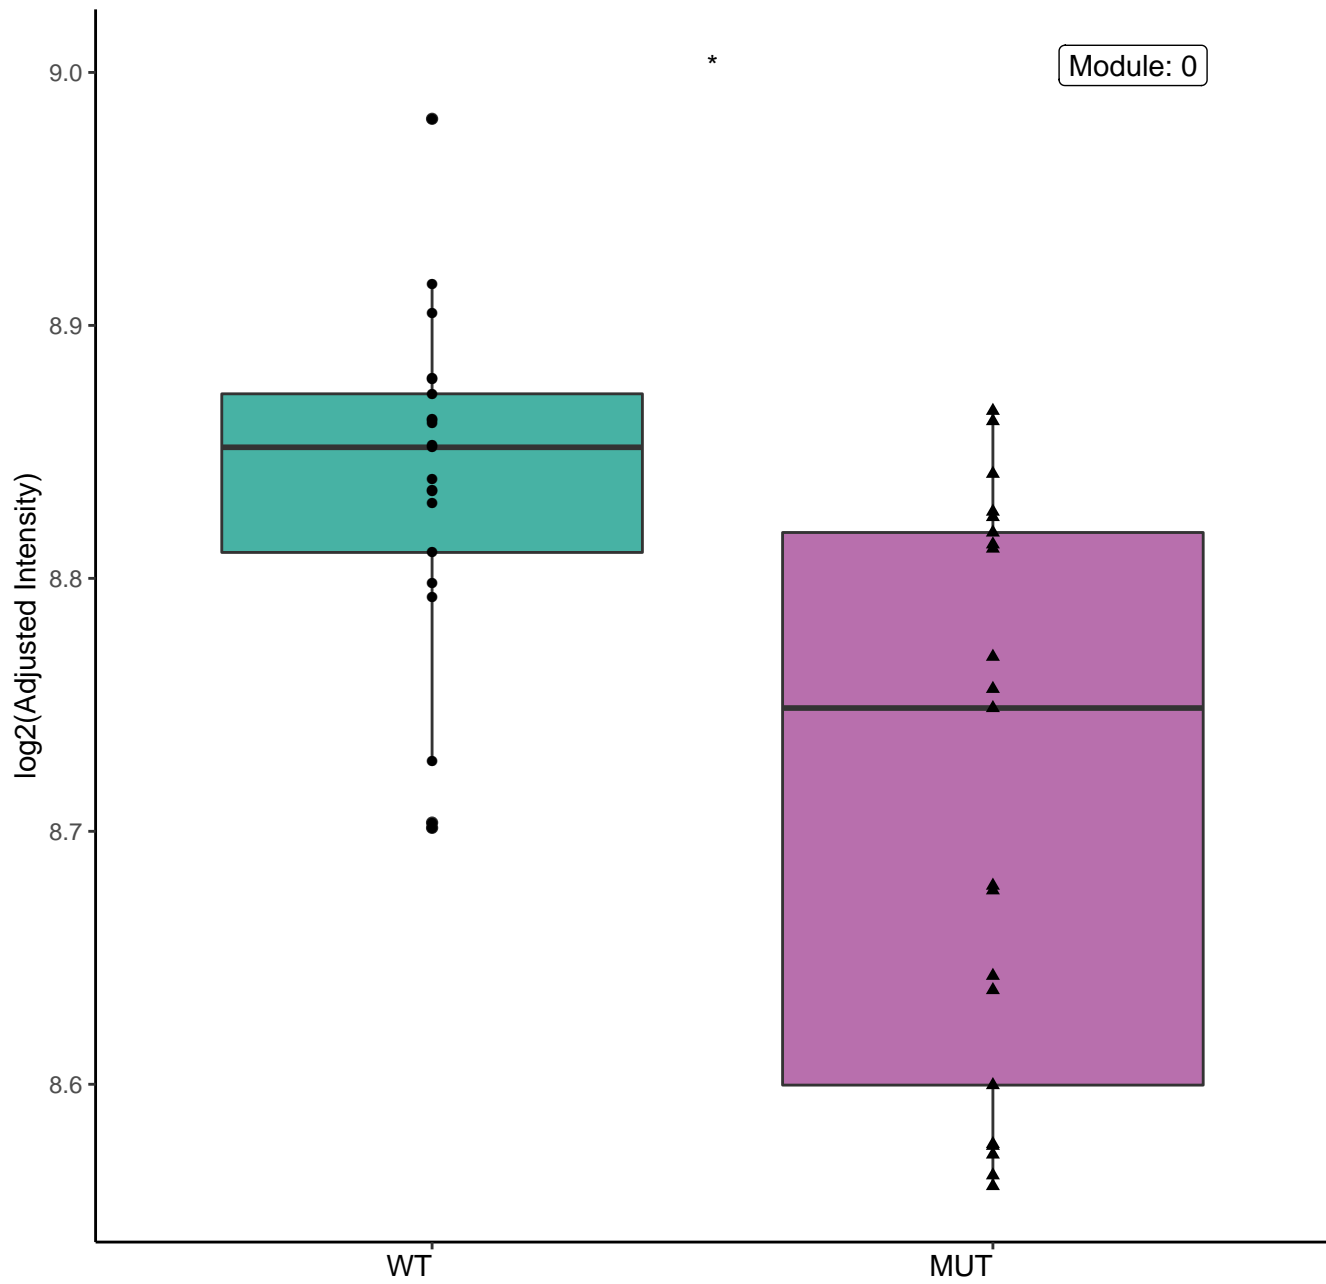

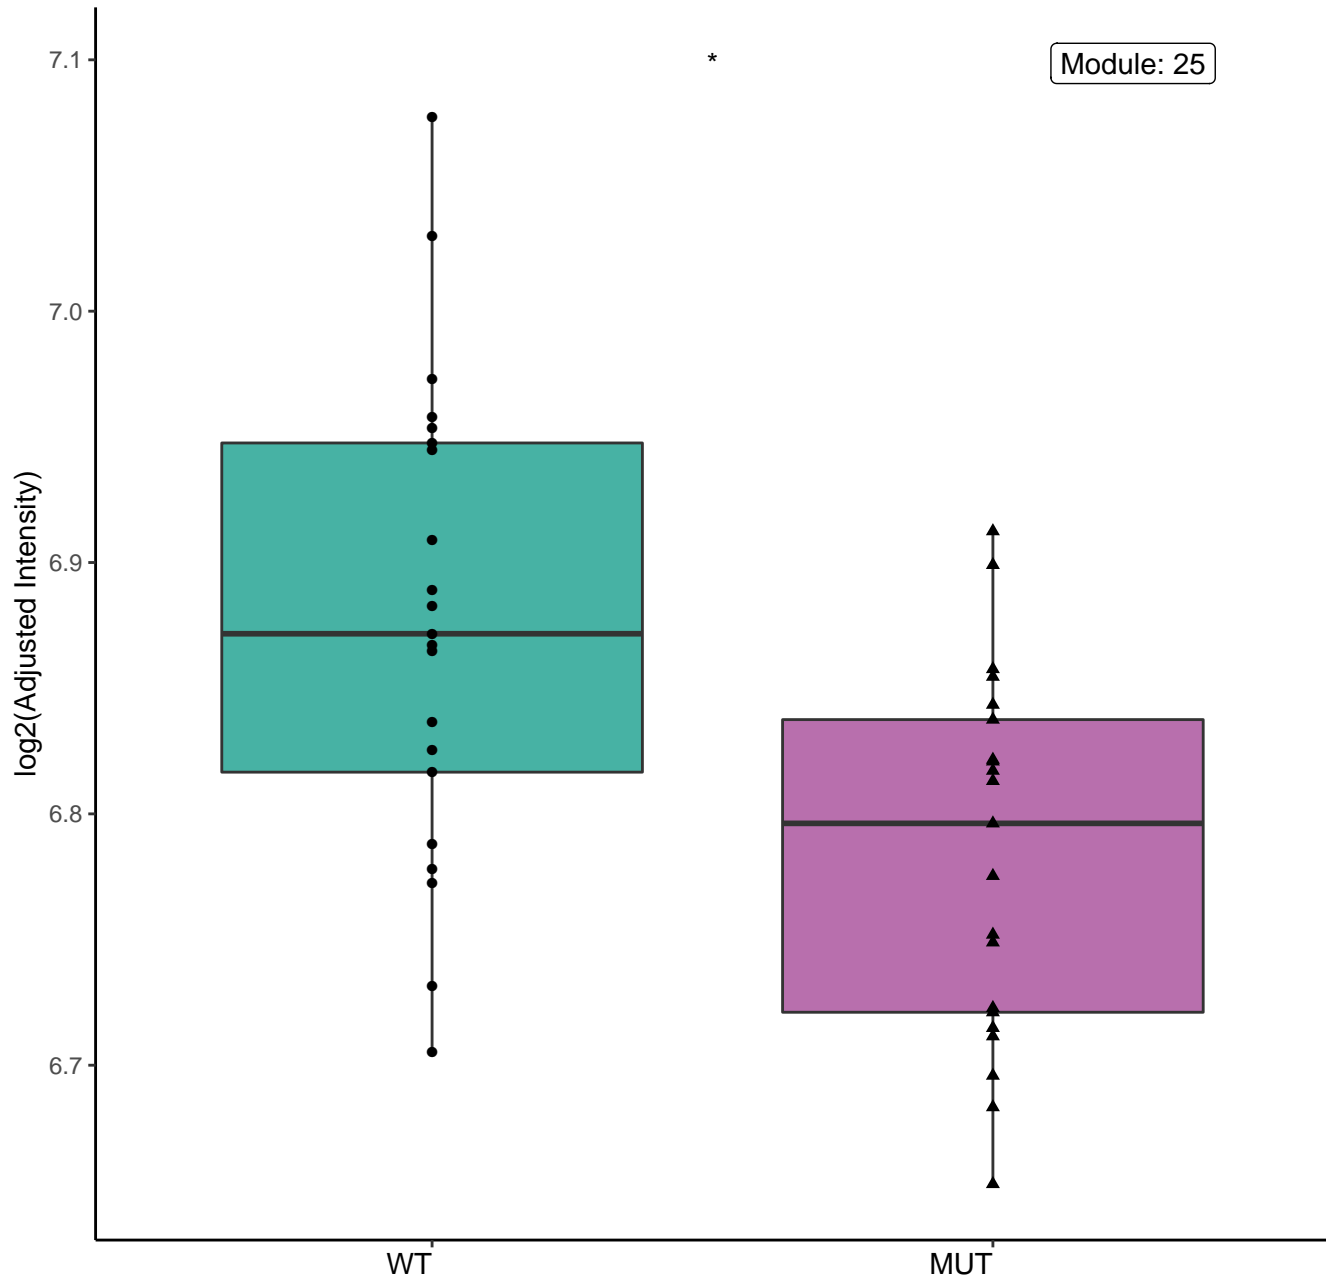

Plot Attributes:	
Attribute	Description
x-axis	WT and MUT (homozygous SWIP ^{P1019R}) groups.
y-axis	Log ₂ (Adjusted Protein Intensity)
point shape	Circles and triangles indicate animal genotype, WT and MUT, respectively.

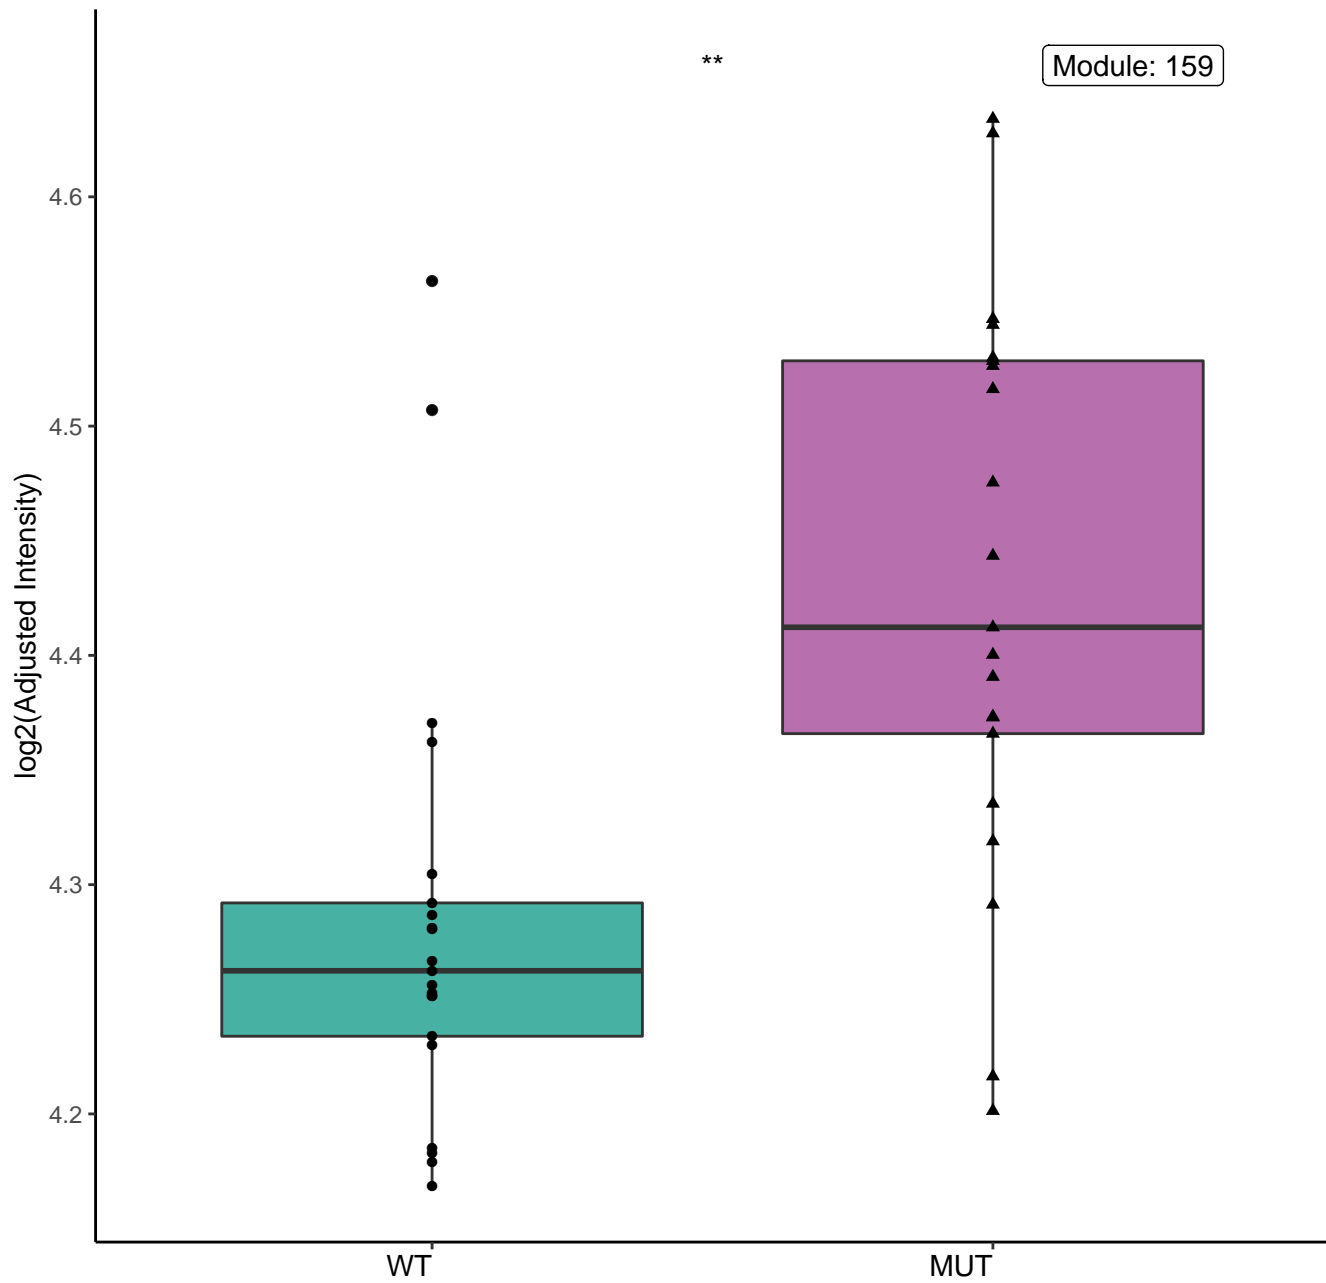

Statistical Significance:	
Symbol	Threshold
▪	FDR < 0.1
*	FDR < 0.05
**	FDR < 0.005
***	FDR < 0.0005
